---

Jim,

Attached is the map and summary of the geophysical work conducted by CDM Smith. They did not conduct test pits at the south Anomaly because it is off the property on the County Hwy right of way. They did not find a tank near the area you marked an anomaly but I would like you to rescreen that area. They did find a tank 100 feet south of where the tank was removed in April-May of 2013. They traced a 2 inch line for 100 feet and encountered the UST.

Steve - attached is the revised figure and text regarding the geophysical survey and proposed test pits and boring locations. Please take a look and let me know when you may be available to discuss. I have the excavator tentatively scheduled for next week.

thanks

Steve – attached is the geophysical report and anticipated work plan for completing test pits within the right of way along the Illinois Railway and County Highway. We are working on the required permit as well as the bond and insurance requirements. We were tentatively scheduled to be onsite next Thursday (10/24), but may not have the county's approval in time.

I am available Monday afternoon and Tuesday after 11 am if you wish to discuss.

Thank you

Chris and Ken,

I met with Larry Kinzler with LaSalle County Hwy Dept yesterday and they will require a permit to be filled out if you are conducting test pits near the road. I still do not have the map and report from your geophysical work. I would like to speak to you about the next steps and schedule to conduct sampling. Please send the map and geophysical report and let me know what works for you for next week to talk.

Thanks

Steve Faryan

David,  
I will be working in Wedron as the project has been put on the exempted list. We are drilling the replacement wells for the 8 affected residences in Wedron. The start date is on October 7 and the project will run into November. Let me know when you will be on site to conduct the geophysical work.

Thanks,

Scheduling for all on-site activities should be coordinated with EPA and probably BP to the extent it gets near their parcel. I understand that Steve Faryan has been deemed an "essential" person so he should be working this week despite the shutdown. He may not be authorized to work on this project however, so you will need to touch base with him if you plan to be out there.

Steve – attached is the geophysical survey and sample location map from the USEPA-approved workplan. We have added the GPS coordinates of the historic site features as requested. Please let me know if you need and additional information. We will be scheduling the geophysical survey. Will the USEPA want to be onsite for the survey?

thanks
